WAGENBOOMSRIWIER & DARLING BRUG IRRIGATION BOARDS **ENVIROAFRICA CC**

NEMA EIA, PUBLIC PARTICIPATION PROCESS

WAGENBOOMSRIWIER & DARLING BRUG IRRIGATION BOARDS: PROPOSED WATER DISTRIBUTION STRUCTURE AND PIPELINE IN THE SNELRIVIER

Notice is hereby given of a public participation process in terms of the National Environmental Management Act, 1998 (Act 107 of 1998) ("NEMA") and the EIA Regulations (2014) as amended, as well as the National Water Act, 1998 (Act 36 of 1998) ("NWA"); for the application for environmental authorisation (EIA) and a water use licence (WULA) to undertake the following:

Relevant notice(s)	Activity No (s)	Description
GN. R. 327 (2014) Listing Notice 1	9	The development of infrastructure exceeding 1000 metres in length for the bulk transportation of water or storm water, (i) with an internal diameter of 0,36 metres or more; or (ii) with a peak throughput of 120 litres per second or more
	12	Development of a (v) weir where the weir and infrastructure and water surface area exceed 100 m ²
	19	The moving of more than 10 m ³ of material within a watercourse.
	27	The clearance of an area of 1 ha or more, but less than 20 ha of indigenous vegetation.
GN. R. 324 (2014) Listing Notice 3	12	Clearance of more than 300 m ² within a critical biodiversity area.

Please note that should additional listed activities be identified during the application process they will be communicated to registered I&AP's. EnviroAfrica cc has been appointed by Wagenboomsrivier & Darling Brug Irrigation Boards to undertake the Environmental Impact Assessment for the proposed project. A notice of intent to develop was submitted to the Department of Environmental Affairs & Development Planning (DEA&DP).

Project Description & Location (33° 29' 54.61"S, 19° 16' 47.81"E)

The project involves the investigation of the impact of a distribution structure according to and in line with a Supreme Court Ruling dated 22 February 2017, to distribute water from the Snelriver and stream according to an 80/20 ratio at a designated point. The 80% of the water will be distributed to the Darlingbrug and Wagenboomsrivier Irrigation Boards. The other 20% will be distributed to the other rightful users as per the high court ruling. Currently two strategies are being investigated and are still in concept design phase. The first suggestion is to build an instream structure in the river bed to divide the water 20/80% to the rightful water users. The second option is to build a much smaller structure on the shore of the river to divide the water 20/80% to the rightful water users. From the structure it is suggested that a pipeline be constructed (about 4km) that will be located on existing farm roads which will distribute the divided water to the rightful water users.

Description of Alternatives:

Alternative includes layout options and the option of not proceeding with the proposed development (the No-Go option) will be discussed in the application process.

Public Participation:

Interested and Affected Parties (I&APs) are hereby notified of the application and invited to register (in writing) and/or provide initial comments and identify any issues, concerns or opportunities relating to this project to the contact details provided below, on or before **14 December 2017**. In order to register or submit a comment, I&APs should refer to the project name, and provide their name, address & contact details (indicating your preferred method of notification) and an indication of any direct business, financial, personal, or other interest which they have in the application. Please note that future correspondence will only be sent to registered Interested and Affected Parties.

BASIC ASSESSMENT APPLICATION FOR A WASTE LICENCE & AMENDMENT OF AN ENVIRONMENTAL AUTHORISATION: WASTE-TO-VALUE PLANT, RCL FOODS, MCALISTER STREET, WORCESTER.

SEC Project No: 0151011

The applicant, Trigen Group (Pty) Ltd, is proposing to adapt their effluent-to-biogas Biodigester plant ("waste-to-value plant"), which is situated at the RCL Foods chicken processing plant, Erf 4396, Worcester. It is proposed to adapt the plant to digest animal manure as well as effluent. The adaptation will entail the installation of various associated infrastructure such as additional digester tanks and a manure storage unit.

The purpose of the Biodigester plant is to generate biogas to fuel a Combined Heat and Power Engine, which in turn supplies some of the RCL plant's electricity, process hot water and steam requirements.

The proposed adaptation will increase the electricity supply capacity of the Biodigester plant from the current +/-1.5MW to up to 10MW.

The plant adaptation will entail energy recovery from general waste (manure); treatment of waste; as well as the construction of facilities for waste management.

These waste management activities require the application for a Waste Licence through a Basic Assessment-type application process. This is in terms of the requirements of the National Environmental Management Act (NEMA); and the NEM Waste Act. An amendment of the current Environmental Authorisation for the effluent Biodigester is also required in terms of the NEMA to authorise the proposed changes to the plant.

If you would like to register as an Interested and Affected Party (I&AP) for this application, or comment on the Basic Assessment Report, please do so in writing, to Colleen McCreadie at SEC:

Post: P O Box 30134, Tokai, 7966
E-mail: colleen@environmentalconsultants.co.za
Tel: (021) 712 5060
Fax: (021) 712 5061

Please quote the SEC Project Number, 0151011, in all correspondence.

The BAR will be available from 10/11/17 electronically for review and download on the SEC website: www.environmentalconsultants.co.za. A hard copy will also be available in the Worcester Public Library for review.

Address: Waterloo Street, Worcester
Tel: 023 348 2773
Opening hours: Monday – Friday: 9:30 – 18:30
Sat: 9:00 – 12:30

Written comments or requests for registration as an I&AP should be received by SEC by no later than 15/12/17.
