20.6.17

Herewith Dasberg Bewarea Beleggings (EDMS)Beperk (also known as De Kaap Boerdery) gives permission to Sangasdrift Trust as from 20 June 2017 to restore and rehabilitate the flood-damaged weir in lower Eksteenskloof just north of the boundary between Sangasdrift Trust and Dasberg Conservancy. None of Dasberg's 14 members had any objection against this restoration project. Close to the original weir is an area where solid rockbed crosses the river, and this may be an ideal place where a new flood resistant weir with solid foundations can be built. Due to occasional flashfloods the weir should also be wide enough to accommodate extra volumes of water. Sangasdrift Trust is thanked in advance by Dasberg Conservancy for this initiative.

Yours faithfully

Philippe du Preez (cell0725994146)

Chairman

Dasberg Conservancy
