

NEMA EIA, PUBLIC PARTICIPATION PROCESS
AFTERFONTEIN BOERDERY: PROPOSED ENLARGEMENT
OF DRIEFONTEIN DAM
(Portion 33 of the Farm Rietvalley No. 364, Ceres)

Dear Interested and Affected Parties (I&APs),

Notice is hereby given of a public participation process in terms of the National Environmental Management Act, 1998 (Act 107 of 1998) ("NEMA") and the EIA Regulations (2014) as amended, as well as the National Water Act, 1998 (Act 36 of 1998) ("NWA"); for the application for environmental authorisation (EIA) and a water use licence (WULA) to undertake the following:

Relevant notice(s):	Activity No (s)	Description
GN. R. 327 (2017) Listing Notice 1	19	The moving of more than 10 m ³ of material within a watercourse.
	27	The clearance of an area of 1 ha or more, but less than 20 ha of indigenous vegetation.
	66	The expansion of a dam where (i) the highest part of the dam wall, measured from the outside toe of the wall to the highest part of the wall, was originally 5 metres or higher and where the height of the wall is increased by 2,5 metres or more.
GN. R 324 (2017) Listing Notice 3	12	Clearance of more than 300 m ² within a critical biodiversity area.

Please note that should additional listed activities be identified during the application process they will be communicated to registered I&AP's.

EnviroAfrica cc has been appointed by Agterfontein Boerdery, to undertake the Environmental Impact Assessment for the proposed project. A notice of intent to develop was submitted to the Department of Environmental Affairs & Development Planning (DEA&DP).

Project Description & Location (33° 21' 10.4"S, 19° 24' 14"E)

It is proposed that the existing Driefontein dam be enlarged as the existing dam does not provide enough storage capacity of the farm for winter listed water. The proposed enlargement of the dam would allow for the storage of summer irrigation water, providing a more efficient use of an already existing water use. With the enlargement of the dam, the dam will have the capacity to store an additional 80 000m³ water per year. The dam wall will be a maximum of 8,4m with a total surface area of approximately 13 ha.

Description of Alternatives:

Alternative includes layout options and the option of not proceeding with the proposed development (the No-Go option) will be discussed in the application process.

Public Participation:

Interested and Affected Parties (I&APs) are hereby notified of the application and invited to register (in writing) and/or provide initial comments and identify any issues, concerns or opportunities relating to this project to the contact details provided below, on or before 14 December 2017.

In order to register or submit a comment, I&APs should refer to the project name, and provide their name, address & contact details (*indicating your preferred method of notification*) and an indication of any direct business, financial, personal, or other interest which they have in the application. Please note that future correspondence will only be sent to registered Interested and Affected Parties.
