

C.	Impact Rating: Operational Phase	NO-GO ALTERNATIVE	WITHOUT MITIGATION(N/A)					WITH MITIGATION(N/A)					Short Description of Mitigation Measures	
			Probability	Extent	Duration	Magnitude	Receiving Environment	Without Mitigation Score (Baseline)	Probability	Extent	Duration	Magnitude		Receiving Environment
No.	ASPECT	IMPACT												
1	Water	Alternation of hydrological regime flow of stream/ drainageline	-1	-1	-1	-1	-1	-1						The implementation of the no-go option would mean the status quo of the environment will remain the same. No mitigation measures recommended.
		Erosion and sedimentation	-1	-1	-1	-1	-1	-1						The implementation of the no-go option would mean the status quo of the environment will remain the same. No mitigation measures recommended.
2	Dust	Potential dust form operations	-1	-1	-1	-1	-1	-1						The implementation of the no-go option would mean the status quo of the environment will remain the same. No mitigation measures recommended.
3	Visual	Potential visual impact form operations	-1	-1	-1	-1	-1	-1						The implementation of the no-go option would mean the status quo of the environment will remain the same. No mitigation measures recommended.
4	Noise	Potential noise impact from operations	-1	-1	-1	-1	-1	-1						The implementation of the no-go option would mean the status quo of the environment will remain the same. No mitigation measures recommended.
