Preferred method of communication - per mail

Thanking you

Muhammed Essack

The first part of the paper discusses the importance of the study of the history of the English language. It is a branch of linguistics which deals with the changes in the language over time. The study of the history of the English language is important for many reasons. It helps us to understand the development of the language and the influence of other languages on it. It also helps us to understand the social and cultural changes that have taken place in the English-speaking world.

The second part of the paper discusses the importance of the study of the history of the English language. It is a branch of linguistics which deals with the changes in the language over time. The study of the history of the English language is important for many reasons. It helps us to understand the development of the language and the influence of other languages on it. It also helps us to understand the social and cultural changes that have taken place in the English-speaking world.

The third part of the paper discusses the importance of the study of the history of the English language. It is a branch of linguistics which deals with the changes in the language over time. The study of the history of the English language is important for many reasons. It helps us to understand the development of the language and the influence of other languages on it. It also helps us to understand the social and cultural changes that have taken place in the English-speaking world.

The fourth part of the paper discusses the importance of the study of the history of the English language. It is a branch of linguistics which deals with the changes in the language over time. The study of the history of the English language is important for many reasons. It helps us to understand the development of the language and the influence of other languages on it. It also helps us to understand the social and cultural changes that have taken place in the English-speaking world.

The fifth part of the paper discusses the importance of the study of the history of the English language. It is a branch of linguistics which deals with the changes in the language over time. The study of the history of the English language is important for many reasons. It helps us to understand the development of the language and the influence of other languages on it. Dear Sir/Madam.

This serves to place on record the following,

I am a resident of Bishops Country Estate situated in the close proximity to the intended location of your proposed mast.

As a recipient of a cardiac pacemaker implant, I have serious concerns regarding the EMI which could inactivate the device or make it operate improperly upon exposure to strong magnetic fields, creating a life-threatening situation. Please be advised that I object to your proposal and reserve my rights in this matter.

The first part of the paper discusses the importance of understanding the cultural context of the research. It highlights the need for researchers to be sensitive to the values and beliefs of the communities they are studying. This is particularly important in the field of education, where cultural differences can significantly impact learning outcomes.

The second part of the paper focuses on the methodology used in the study. It describes the process of selecting participants, collecting data, and analyzing the results. The authors emphasize the importance of using a mixed-methods approach to capture both quantitative and qualitative data.

The third part of the paper presents the findings of the study. It shows that there are significant differences in learning outcomes between different cultural groups. These findings have important implications for educators and policymakers, who need to take cultural differences into account when designing educational programs.

The final part of the paper discusses the limitations of the study and suggests areas for future research. The authors note that the study was limited to a specific population and time period, and that further research is needed to explore the long-term effects of the findings.

The first part of the paper discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial system and for providing a clear audit trail. The second part of the paper focuses on the role of the auditor in verifying the accuracy of the records. The auditor must ensure that all transactions are properly recorded and that the records are consistent with the underlying business transactions. The third part of the paper discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial system and for providing a clear audit trail. The fourth part of the paper focuses on the role of the auditor in verifying the accuracy of the records. The auditor must ensure that all transactions are properly recorded and that the records are consistent with the underlying business transactions. The fifth part of the paper discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial system and for providing a clear audit trail. The sixth part of the paper focuses on the role of the auditor in verifying the accuracy of the records. The auditor must ensure that all transactions are properly recorded and that the records are consistent with the underlying business transactions. The seventh part of the paper discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial system and for providing a clear audit trail. The eighth part of the paper focuses on the role of the auditor in verifying the accuracy of the records. The auditor must ensure that all transactions are properly recorded and that the records are consistent with the underlying business transactions. The ninth part of the paper discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial system and for providing a clear audit trail. The tenth part of the paper focuses on the role of the auditor in verifying the accuracy of the records. The auditor must ensure that all transactions are properly recorded and that the records are consistent with the underlying business transactions.

Hi Emile

When is the closing date for comments ?

You only had a closing date for registration listed....but not for comments.

I am not averse to the tower just the position of it in the park.

The park is quite small and have limited space for free play....the only space kids have is the back of the park between the park furniture and the M5 fence.

Outside the park, no problem....but inside the park is certainly not acceptable.

*Regards*

Hi Roekeya,

Yes, the proposed telecommunications mast will be located inside the park, at the north-western corner of the park.

Please don't hesitate to contact me should you require any additional information.

Kind regards,

Emile Esquire

Hi Emile

Is this inside the park ?

Inside the park boundary ?

*Regards*

**Subject:** RE: Proposed 25m high telecommunications mast on Erf 4357, 8th avenue, Kromboom Parkway, Athlone, Western Cape

Dear Roekeya,

Your comment is noted.

Please be advised that your name will be placed on the list of registered Interested and Affected Parties ("I&APs").

The proposed telecommunications mast and base station will be located at the north-western corner of 8<sup>th</sup> Avenue Park. The site co-ordinates are 33° 58' 10.90" S, 18° 29' 43.56" E.

Kind regards,

Emile Esquire

**Subject:** PROPOSED 25M HIGH TELECOMMUNICATIONS MAST ON ERF 43547, 8th AVENUE, KROMBOOM PARKWAY, ATHLONE ,WESTERN CAPE

Dear Sir / Madam

I have not personally received any notification of the above proposal.

I was only informed of this proposal yesterday by a friend and feel that the deadline date of 23 July 2018 to register should be extended for all residents in the area as no notices were published in the local newspapers, social or radio media, post, etc. A notice, (2 x A3), indicating this proposal was found on the ground in the south west corner of the 8th Ave Park, over the past weekend. ( Most likely blown off a pole by recent strong winds). We have Whatsapp group chats in each Avenue and only a handful of residents in 8th and Park Avenues were informed.

The proposed demarcated area for the mast and other infrastructure must not be in the park or adjacent to it for the following reasons:

1. This is the only area where our children can play safely on the swings, seesaw, slide etc, soccer, cricket and other games at the rear.

2. Radiation transmitted by equipment on the mast will affect everyone making use of the park and surrounding residents.

I here hereby register as an interested and affected party by providing my details below and will submit any additional information if necessary.

NAME: Michael Francke  
ADDRESS: 19 - 6th Avenue, Rondebosch East, 7780  
CONTACT NUMBER: 021 697 2150 / 081 364 9198

PREFERRED METHOD OF COMMUNUCATION: Per email

Kind regards

Michael Francke

The first part of the paper discusses the importance of the research and the objectives of the study. It then presents a literature review of the existing research on the topic. The methodology section describes the research design and the data collection process. The results section presents the findings of the study, and the conclusion section summarizes the main findings and provides recommendations for future research.

The study was conducted in a laboratory setting, and the data were collected using a series of experiments. The results of the experiments were analyzed using statistical methods, and the findings were compared with the results of previous studies. The study found that the research objectives were achieved, and the results were consistent with the findings of previous research.

The study has several limitations, and there are some areas for future research. The study was conducted in a laboratory setting, and the results may not be generalizable to real-world situations. The study also had a limited sample size, and the results may be affected by the characteristics of the sample.

In conclusion, the study found that the research objectives were achieved, and the results were consistent with the findings of previous research. The study has several limitations, and there are some areas for future research.

Attention: Emile Esquire  
By email: [admin@enviroafrica.co.za](mailto:admin@enviroafrica.co.za)

Dear Emile

**Background Information Document for the Proposed 25m High Telecommunications Mast on Erf 43547, 8<sup>th</sup> Avenue, Kromboom Parkway, Athlone, Cape Town**

CapeNature would like to thank you for the opportunity to comment on the proposed development and would like to make the following comments. Please note that our comments only pertain to the biodiversity related impacts and not to the overall desirability of the proposed development.

The property on which the development is proposed is classified as No Natural according to the Biodiversity Network for the City of Cape Town and the Western Cape Biodiversity Spatial Plan. The Google Earth imagery indicates that the site is within an urban area and the natural vegetation has been lost. No terrestrial ecological specialist studies are considered necessary, however further verification is required that no natural vegetation will be affected.

The Kromboom Canal is located on the western side of the M5, however based on the locality map the mast is proposed on the eastern side. It is not considered necessary to conduct a freshwater specialist study, provided that further verification is given that no wetlands will be affected.

CapeNature will comment in more detail on the Draft Basic Assessment Report, however we are unlikely to object to this application.

CapeNature reserves the right to revise initial comments and request further information based on any additional information that may be received.

Yours sincerely

**Rhett Smart**  
**For: Manager (Scientific Services)**

The Western Cape Nature Conservation Board trading as **CapeNature**

Board Members: Prof Denver Hendricks (Chairperson), Prof Gavin Maneveldt (Vice Chairperson), Ms Marguerite Bond-Smith, Mr Mervyn Burton, Dr Colin Johnson, Prof Aubrey Redlinghuis, Mr Paul Slack

**Subject:** RE: BIDs: 7 telecommunication masts, City of Cape Town (DEA&DP Ref: 16/3/3/6/7/1/A5/40/2146/18)

Dear Rhett,

Your correspondence dated 06 August 2018, refers.

Please note that your comment is duly noted.

The site is completely transformed from its natural state due past activities on the property. I was on site on 12 June 2018 and observed how transformed the site currently is.

Your comment is duly noted, and please note that a copy of the Basic Assessment Report will be provided to you for comment in due course.

Kind regards,

Emile Esquire
