

Detailed breakdown of existing structures

Status Quo of existing structures	
	Informal Structures
	Permanent Structures
	Permanent Structures not present during survey

A total of 132 permanent structures are already been established in Gamakor

It is impossible to determine the amount of existing structures, due to the construction of new structures after the land survey, as well as the outdated Google Earth aerial photo. It is anticipated that a total of amount of 900 structures can be found within the Gamakor Community.

Impact of Concept 5 on existing structures

- 58 structures will have to be moved. These structures must either just move a few meters to be positioned within a land unit or a move to the nearest proposed land unit. **Kindly note this only pertains to the structures captured during the land survey.**
- 69 structures will have to be relocated.
- 38 structures are situated within stormwater furrows
- 21 structures are situated within proposed road network
- 10 Structures do not comply with minimum size requirement
