Dear Anthony

Thank you for the reply.

I would like to respond to the SSV, provided.

As such, may you please also indicate whether you agree or dispute the site sensitivities as revealed in the Screening Tool Report.

Should you agree or disagree please also remember to indicate what type of sensitivity should rather be applied to the identified themes, based on your determinations. You could also indicate whether no sensitivities should be applied at all to certain/specific themes.

For ease of reference, below follows the site sensitivities revealed in the Screening Tool Report dated 24 November 2020:

Agriculture Theme - Very High sensitivity;
Animal Species Theme - Medium sensitivity;
Aquatic Biodiversity Theme - Very High sensitivity;
Civil Aviation Theme - High sensitivity;
Defence Theme - Low sensitivity;
Paleontology Theme - Low sensitivity;
Plant Species Theme - Medium sensitivity; and
Terrestrial Biodiversity Theme - Very High sensitivity.

You are more than welcome to email me the information, by responding to this mail.

Many Thanks

Natasha
