SECTION D: PROJECT DESCRIPTION

1.	Is this an Application for a:	Basic Assessment Process	Scoping Environmental Impact Report	
2.	Is this a strategic infrastructure project ("SIP") as contemplated in the Infrastructure Development Act, 2014 (Act No. 23 of 2014)?		YES	NO
3.	Is the proposed development (please tick):	New	Expansion	
4.	Is the proposed site(s) a brownfield of greenfield site? Please explain.			
The proposed site has recently been cleared of alien vegetation and so is close to natural, but in certain places is quite disturbed and therefore does not fit neatly into the category of greenfield nor into the category of brownfield.				
5.	For Linear activities or developments			
5.1.	Provide the Farm(s)/Farm Portion(s)/Erf number(s) for all routes:			
Erf 1886 and Erf 1887, Ceres				
5.2.	Development footprint of the proposed development for each alternative.			m ²
Approximately 2500m long pipeline of approximately 0.35m diameter and a working area of 10m in total from the sides of the pipeline = approximately 28875m ²				
5.3.	Provide a description of the proposed development (e.g. for roads the length, width and width of the road reserve in the case of pipelines indicate the length and diameter) for all alternatives.			
<p>The proposed development is a bulk water supply pipeline of approximately 2.5km in length and 350mm in diameter on Erven 1886 and 1887, Ceres to deliver bulk water water from the Tierhokskloof Stream to the Wittebrug Water Purification Plant ("WPP") for supplying potable water to the town of Wolseley.</p> <p>The above-ground length of the pipeline will extend for approximately 1.8km from the intake works in the Tierhokskloof Stream and up onto the rocky mountainside towards the Wittebrug WPP. This portion of the pipeline will be made of durable material such as ductile iron and will rest on stilts. In areas where the mountainside slope is extra steep, stone barriers or retaining walls will be used to support and keep the pipeline in place.</p> <p>The remaining 700m length of the pipeline will be constructed underground in the valley located to the west of the proposed site up to a connection point at the Wittebrug WPP. The underground length of the pipeline will be made of more cost-effective material such as HDPE.</p>				

A working area of not more than 10m in total from the sides of the proposed pipeline will be kept to and so the proposed pipeline will be alongside the existing bulk water supply pipeline and the maximum distance between the two pipelines will be 10m. When the proposed pipeline starts being used, the existing pipeline will stop being used.

The co-ordinates along the pipeline route include the following:

Abstraction point in Tierhokskloof Stream (33° 25' 44.71"S, 19° 17' 0056"E), Waypoints (33° 25' 20.52"S, 19° 16' 57.04"E) and (33° 25' 14.84"S, 19° 16' 28.74"E) and End point at Witbrug Water Purification Plant (33° 25' 19.20"S, 19° 15' 59.74"E)

Access to the proposed site will be gained off Michells Pass onto the gravel track that passes in front of the gate of the WPP

5.4.		Indicate how access to the proposed routes will be obtained for all alternatives.	
The proposed site is on a mountainside and access is available only on foot from the R43 Regional Road			
5.5.	SG 21 Digit codes of the Farms/Farm Portions/Erf numbers for all alternatives	C01900010000188600000 for Erf 1886, Ceres and C01900010000188700000 for Erf 1887, Ceres	
5.6. Starting point co-ordinates for all alternatives			
	Latitude (S)	33° 25'	44.71"S
	Longitude (E)	19° 17'	00.56"E
Middle point co-ordinates for all alternatives			
	Latitude (S)	33° 25'	20.52"S,

End point co-ordinates for all alternatives			
	Latitude (S)	33° 25'	14.84"
	Longitude (E)	19° 16'	28.74"E
Note: For Linear activities or developments longer than 500m, a map indicating the co-ordinates for every 100m along the route must be attached to this Application Form as an Appendix.

SECTION F: SPECIALIST INPUT

Note:

Please note that the submission of a report generated from the National Web Based Environmental Screening Tool in terms of Section 24(5)(h) of the NEMA and Regulation 16(1)(b)(v) of the EIA Regulations, 2014 (as amended), is compulsory when submitting an application for environmental authorisation in terms of Regulation 19 and 21 of the EIA Regulations, 2014 (as amended).

The Screening Tool developed by the National Department of Environmental Affairs must be used to generate a screening report. Please use the Screening Tool link <https://screening.environment.gov.za/screeningtool> to generate the Screening Tool Report. The Screening Tool Report must be attached to this NOI Form as Appendix D.

1.	Will you be conducting the specialist input as recommended in the screening tool report?	YES	NO
<p>If no, indicate which specialist investigations will not be conducted and provide an explanation why.</p> <p>The Plant Species Theme and Animal Species Theme will be adequately dealt with in the Terrestrial Biodiversity specialist study report and so specialists will not be appointed to deal with these themes in separate specialist reports.</p> <p>It is unlikely that the proposed pipeline of approximately 2500m in length that will be above the ground for approximately 1800m and underground for approximately 700m can cause a significant impact on the hydrological characteristics of the catchment area. This opinion is reinforced by the fact that the proposed pipeline will merely replace the existing pipeline without any increase in the amount of water to be abstracted from the Tierhokskloof Stream. A hydrology Assessment is therefore not warranted.</p> <p>A Health Impact Assessment, Socio-economic Impact Assessment and an Ambient Air Quality Impact Assessment will also not be conducted, as the proposed above-ground water supply pipeline is merely to replace an old existing water supply pipeline constructed in 1953 and is therefore unlikely to introduce any new significant impacts in the area that would warrant appointing specialists to conduct the said specialist studies.</p>			

However, should any Organ of State with jurisdiction regarding a particular Theme require that a specialist assessment be conducted for the proposed development, a specialist shall be appointed to conduct the specialist assessment.	
2.	List the specialist investigations to be conducted as part of the EIA process and provide the name(s) of the specialist(s).
Terrestrial Biodiversity, Aquatic Biodiversity and Archaeological/ Cultural Heritage/ Palaeontology Impact Assessment and Agricultural Impact Assessment.	
3.	Explain whether any protocols are applicable to your proposed development, if so provide a list of the applicable protocols.
Protocols are applicable to the Terrestrial Biodiversity, Aquatic Biodiversity and Agricultural Theme
