

[1] The photo was taken from the center of the proposed site, looking generally towards the north. The area is characterised by grassland, used for grazing purposes, amongst others. In the foreground, there is a drainage line feeding into a small dam.

The photo was taken during a site visit on 7 November 2023, as part of the initial public participation phase.

Approximate coordinates:

S29°01'25.28"

E29°49'32.35"

[2] The photo was taken from the south of the proposed site, looking generally towards the north. In the foreground, there is a forested area consisting of a mix of trees, with some species identified as black wattle.

The photo was taken during a site visit on 7 November 2023, as part of the initial public participation phase.

Approximate coordinates:

S29°01'36.89"

E 29°49'47.92"

[3] The photo was taken from the east of the proposed site, looking generally towards the west. In the foreground, there is a drainage line feeding into a small dam.

The photo was taken during a site visit on 7 November 2023, as part of the initial public participation phase.

Approximate coordinates:
S29°01'1.37"
E29°49'35.80"

[4] The photo was taken from the north of the proposed site, looking generally towards the south. A road leading down to Ntabamhlope Road can be seen on the left hand side.

The photo was taken during a site visit on 7 November 2023, as part of the initial public participation phase.

Approximate coordinates:
S29°00'54.54"
E29°49'32.18"

[5] The photo was taken from the north of the proposed site, looking generally towards the south. In the foreground, there is a forested area consisting of a mix of trees, with some species identified as black wattle.

The photo was taken during a site visit on 17 September 2024, as part of the initial public participation phase.

Approximate coordinates:
 S29° 1'2.01"
 E29°49'17.65"

[6] The photo was taken from the centre of the proposed site, looking generally towards the north-east. In the foreground, there is a drainage line feeding into a small dam.

The photo was taken during a site visit on 17 September 2024, as part of the initial public participation phase.

Approximate coordinates:
 S29°01'10.07"
 E 29°49'27.74"
